

BARUM ENGINES
Classic & Competition

For compliance with our warranty policy, external components such as Turbochargers, Superchargers, Injectors, Fuel Pumps, Fuel Pressure Regulators, Carburetors, and all other ancillary components MUST be reconditioned, professionally tested or renewed.

Barum Engines Ltd requests that the fuel injectors are sent away for testing - faulty injectors can cause serious engine damage. *Recommended Injector Testing Facilities: ANSU, PJ Motorsport, Mr Injector UK.*
